Residents of Bibbern expressed concerns regarding the security of the boundary and had varying opinions on the height and boundary treatments in relation to their individual properties. A resident of Bibbern Row expressed concerns of loss of privacy and light caused by a row of terraced houses 11 metres from a bungalow and suggested that further amendments were required to protect their residential amenity, as had been offered to Kingsmead. He expressed frustration at the lack of neighbour consultation and communication from the Planning Officer and requested that the TC & the Dorset Council member request that the application goes before the North Dorset Area Planning Committee. Concerns were expressed by a resident of the private road off Thornhill Rd and Greenfields on the other side of the site also relating to the distance to their property and the boundary treatments.

2/2020/0123/HOUSE Residents of neighbouring properties expressed concerns regarding, overlooking of neighbouring properties and the application was considered to be over development of the site which is in the conservation area and adjacent to a listed building.

Some inaccuracies in the road transport statement were noted and disappointment expressed at the generic nature of the application. Members had varying opinions on the need for street lighting on the site.

GENERAL COMMENTS

- The proposed proximity of the new dwellings are not in accordance with a statement made by the Senior Planning Officer (North Dorset District Council Planning Committee Meeting 27th February 2018) that the new properties would need to be at least 20m away from the existing properties in the adjoining Bibbern Row, those of the private drive off Thornhill Road and Greenfields to avoid overlooking and overshadowing in relation to loss of amenity.

- Units 16 & 17 are prohibited from having first floor windows on the north elevation.
- The highway is adopted
- That the site boundary is planted where specified with mature native hedging before the development starts and that specific attention is given to detail of the areas of soft landscaping in boundary areas with existing properties on all sides of the development to afford the minimum detriment to the residential amenity of residents of existing properties.
